203 NME Front, 101 Ste.
Milford, DE 19963

Erik Nyman:

Internet Gaming Submission

This will acknowledge your recent internet gaming submission to the MGCB Laboratory. Your request has been reviewed, and the results are summarized below.

Your request is approved/conditionally approved/denied as noted. Any approvals are granted with the understanding the submission is complete and accurately described as submitted, and the submission is in compliance with all applicable provisions of the Lawful Internet Gaming Act, PA 152 of 2019, and related administrative rules, R 432.611 to 432.676. An internet gaming operator must install or use an internet gaming platform or internet game, or both, that has been approved by the board unless otherwise provided in writing by the board. An internet gaming operator must not alter the manner in which the internet gaming platform or internet game operates without the prior written approval of the board. Any change or modification to the internet gaming platform that impacts a regulated feature, as described in R 432.637a, requires submission to and approval by the board before implementation in accordance with the internet gaming operator's and its internet gaming platform provider's approved change control processes. An incomplete or inaccurate submission or violation of any applicable provision of the Lawful Internet Gaming Act, related administrative rules, or a bulletin or order of the board may be considered grounds for revocation of approval and disciplinary action. If you have any questions or concerns regarding this decision, feel free to contact me via phone or email.
