DEAD OR ALIVE

Wanted Dead or alive: Mr. Joe Boneson, 50.000\$

Thus read the sign that sealed the towns people's doom. Not long after its posting, a mysterious gunslinger showed up at the sheriff's doorstep and promised to deliver the scoundrel to justice.

The towns people were incredulous at first, but as promised the criminal hanged from the gallows at noon the same day, and by evening they had already tossed his corpse to the desert dogs.

But the not so dearly departed was not without friends. A week later three riders galloped into town; guns blazing and hungry for vengeance. Their violent ransack of the town was so wild that it bordered to madness, and not even the dead could sleep quietly that night...

WIN PROBABILITIES

Mega Win: (70+) 1 in 463
Epic Win: (100+) 1 in 886

BONUS WILD SYMBOL

The Bonus Wild symbol appears on all reels and substitutes for all symbols. 2 Bonus Wild symbols landing on the reels in the Base Game activate the Double Bonus Respin Feature.

3 or more Bonus Wild symbols appearing on the reels in the Base Game or Double Bonus Respin Feature activate the Showdown Free Spins.

DOUBLE BONUS RESPIN FEATURE

2 Bonus Wild symbols landing on the reels in the Base Game activate the Double Bonus Respin Feature. Line wins are evaluated and paid out first. Then the two reels where the Bonus Wild symbols have landed are locked and the rest of the reels respin.

SHOWDOWN FREE SPINS

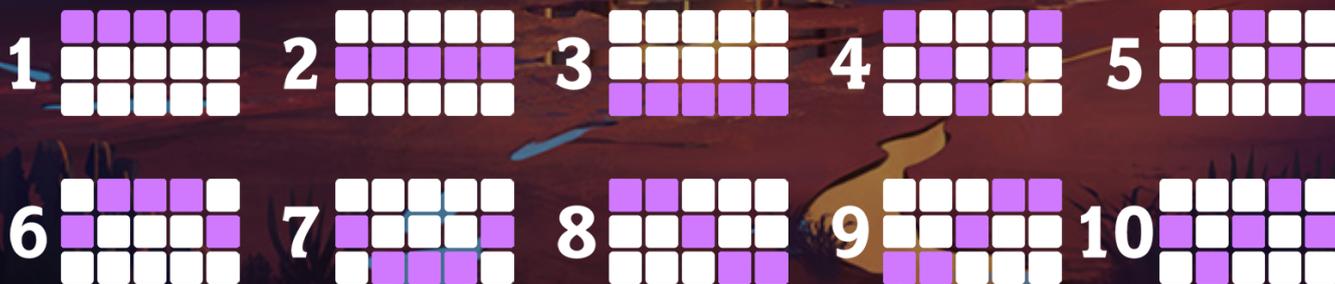

3, 4 or 5 Bonus Wild symbols award 10, 15, or 20 Showdown Free Spins respectively. The Showdown Free Spins start with the Gatling Wheel Bonus Game. The Gatling Wheel Bonus Game is played automatically. The Gatling Wheel is a wheel with 16 positions. Each position has a Multiplier value on it. 3 Gatling Wheel spins are awarded.

The top center position is selected when a Gatling Wheel spin ends.

Each position on the Gatling Wheel can only be selected once.

The Multiplier values on the selected positions are added.

During the following Showdown Free Spins, every landed Bonus Wild symbol pays a win equal to the Bet multiplied by the current sum of all selected Multiplier values.
